SAMPLE DELIVERABLE

# E-Commerce Homepage UI Blueprint

Developer-ready, section-by-section specification: editable fields, states, motion, responsive rules and accessibility.

| | |
|---|---|
| Subject | Public demo store of Shopify's free "Dawn" theme (dawn-theme-default.myshopify.com) |
| Scope of this sample | Global tokens + 3 of 8 homepage sections in full detail |
| Viewports checked | Desktop 1440 × 900 · Mobile 390 × 844 |

## How to read this document

- Each section starts with a short **narrative**: what the block does and how it behaves.
- Long setting lists are in **tables** so developers can scan them.
- **Measured** values were read from the live page's computed styles. **Recommended** values are spec suggestions where the source doesn't define behavior.
- Sizes are CSS px at the stated viewport. Colors are RGB.

## Homepage section map (top → bottom)

| # | Section | Height @1440 |
|---|---|---|
| 1 | Announcement bar + Header | 38 + 85 px |
| 2 | Hero image banner | 720 px |
| 3 | Rich text (brand statement) | 130 px |
| 4 | Featured collection grid | 887 px |
| 5 | Collage ("Back in stock!") | 854 px |
| 6 | Video with play overlay | 584 px |
| 7 | Press quotes / logos | 150 px |
| 8 | Footer + newsletter | 579 px |

This sample was prepared to show format and depth. It is not client work; Dawn is a public Shopify theme.

00 · GLOBAL

# Design tokens & global rules

These values apply to every section and should be set once as CSS custom properties or theme settings, not hard-coded per block. Sections refer back to these names.

| Token | Value | Notes |
|---|---|---|
| `font-heading / font-body` | Assistant, sans-serif | Single family. Headings weight 400, letter-spacing 0.6px. |
| `color-foreground` | rgb(18,18,18) | Body text uses it at 75% alpha: `rgba(18,18,18,.75)`. |
| `color-background` | rgb(255,255,255) | Default scheme. Hero uses an inverse (white text) scheme. |
| `color-button / button-text` | rgb(18,18,18) / rgb(255,255,255) | Primary solid button. Secondary = transparent fill + 1px border. |
| `accent (badge)` | rgb(51,79,180) | "Sale" badge fill, white text. |
| `page-width` | max 1600px, side padding 50px | Content is centered. On mobile, side padding is 15px **(recommended check)**. |
| `duration-short / default / long` | 0.1s / 0.2s / 0.5s | Use these 3 values only, so motion feels consistent. |
| `ease-card-image` | cubic-bezier(.25,.46,.45,.94) | Used for the product image swap on hover (0.4s). |
| `button base` | min-height 45px, padding 9/30/11px, 15px, ls 1px, radius 0 | Same metrics for primary and secondary buttons. |

## Breakpoints

| Name | Range | Layout rules |
|---|---|---|
| Mobile | < 750px | Hamburger menu, logo centered, product grid 2 columns, hero text stacks over image. |
| Tablet | 750–989px | Product grid 3 columns. Header still uses drawer menu. |
| Desktop | ≥ 990px | Inline menu with dropdowns, product grid 4 columns, hero text centered over image. |

## Global accessibility

- **Skip link:** first focusable element, label "Skip to content", target `#MainContent`. Visually hidden until focused. **Present.**
- **Lists:** menus and grids use `<ul role="list">` so Safari/VoiceOver still announce them as lists after `list-style:none`. **Present.**
- **Decorative icons:** SVGs have `role="presentation"` and are hidden from screen readers. Every icon-only button needs a text label. **Present.**
- **Focus style:** visible outline on every interactive element, at least 2px, 3:1 contrast against the background. **Recommended.**
- **Reduced motion:** wrap reveal/parallax/hover animations in `@media (prefers-reduced-motion: no-preference)`. **Recommended.**

01 · ANNOUNCEMENT BAR + HEADER

# Announcement bar & site header

A one-line announcement ("Free shipping available on all orders!") sits above the header. The header shows the logo on the left, an inline menu (Bags ▾, Shoes ▾, Lookbook) and three icons on the right: Search, Log in, Cart. On mobile the menu collapses to a hamburger on the left, the logo moves to the center, and the Log in icon is hidden. Search and Cart remain.

## Editable fields

| Field | Type / default | Rules |
|---|---|---|
| Announcement text | Text · "Free shipping available on all orders!" | 1 line. Truncate with ellipsis on mobile. Optional link on the whole bar. |
| Announcement colors | Color scheme · white bg / rgb(18,18,18) text | 13px, letter-spacing 1px, bar height 38px. Bottom border 1px. |
| Logo | Image or text · "DAWN" | Max width setting (px). `alt` = store name. Logo links to `/`. |
| Logo position | Select · desktop: left / mobile: center | Options: left, center. Mobile always centered. |
| Main menu | Menu reference · 3 items | Items with children render as dropdowns (2 here: Bags, Shoes). |
| Sticky header | Select · **"on scroll up"** | Options: none / always / on scroll up. Recommended: on scroll up, to keep vertical space. |
| Header padding | **20px top / 20px bottom** | Total header height 85px at desktop. |

## States & interactions

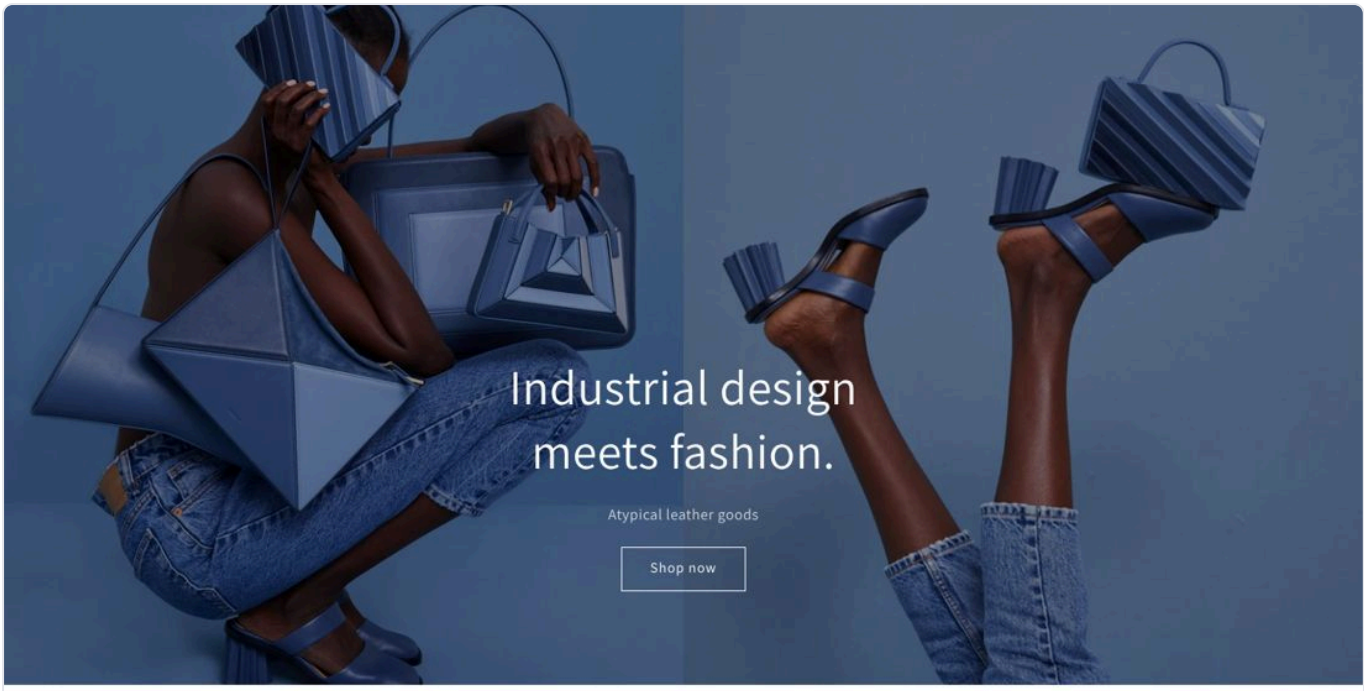

| Element | Behavior |
|---|---|
| Menu item (link) | Default: 75% text alpha. Hover: underline + 100% alpha, 0.1s. Active page: permanent underline. |
| Dropdown (Bags, Shoes) | Built on native `<details>/<summary>`: opens on click, closes on outside click or `Esc`. Caret rotates 180° when open (0.2s). Dropdown panel: white bg, 1px border, list of child links. |
| Hamburger (mobile) | `<summary role="button" aria-label="Menu">`. Opens a full-height drawer from the left (0.5s). Body scroll locked while open. Icon morphs ☰ → ×. |
| Search icon | Opens a search modal with an input in focus. `Esc` closes it and returns focus to the icon. |
| Cart icon | Shows a count bubble when cart > 0 (dynamic label, e.g. "Cart, 2 items"). Hover: icon scale 1.07, 0.1s. |

## Accessibility

- Wrap the announcement in `role="region" aria-label="Announcement"`. **Present.**
- Focus order: Skip link → Logo → Menu items → Search → Log in → Cart.
- Icon buttons need text labels: "Search", "Log in", "Cart" (+ count). **Present.** Open dropdowns must expose `aria-expanded`.

02 · HERO IMAGE BANNER

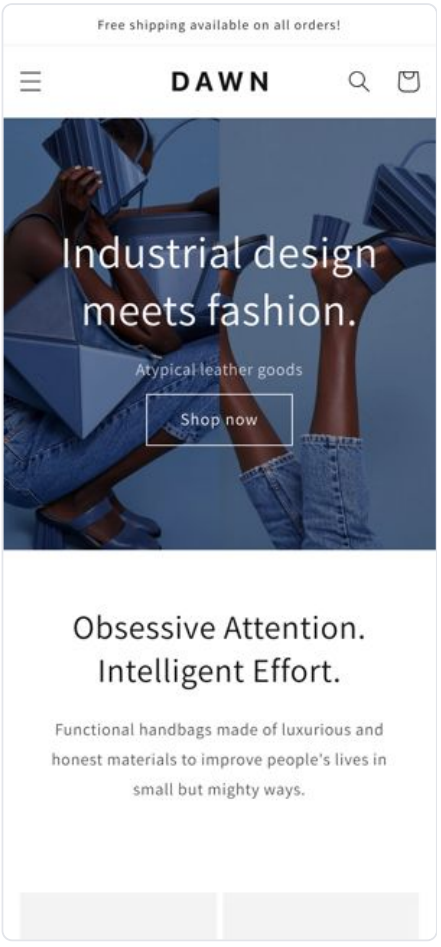

# Hero image banner

A full-width banner made of **two side-by-side images** (each 50vw) with centered text on top: heading "Industrial design meets fashion.", a subheading "Atypical leather goods" and a secondary (outline) button "Shop now". The text block has no background box on desktop ( `banner--desktop-transparent` ). Text is white, so the images must be dark enough for 4.5:1 contrast.

On mobile the two images remain side by side at 50% width each. The text stays centered over them, the heading wraps to 2 lines, and the button keeps its full outline.

> **Developer note:** the images are lazy-loaded, but this is the first screen (LCP element). Set the first image to `loading="eager"` + `fetchpriority="high"` to improve Largest Contentful Paint. **Recommended fix.**

Mobile, 390px

### Editable fields

| Field | Value / default | Rules |
|---|---|---|
| Image 1 / Image 2 | Image picker · 2 images | If only one image is set, it spans 100%. `sizes="50vw"` . Alt text optional (decorative). |
| Banner height | Select · **720px @1440** | Options: adapt to image / small / medium / large. |
| Overlay opacity | Range 0–100% · **0%** | Recommended 20–30% black if text contrast fails on new images. |
| Heading | Text · **52px / 67.6px, 400, ls 0.6px, white** | Size options: small / medium / large. Max 2 lines on mobile. |
| Subheading | Rich text · **16px, white 75%** | Optional. |
| Button label + link | "Shop now" → collection | Style toggle: primary (solid) / secondary (outline). **Secondary.** |
| Content position | 3×3 grid · **middle center** | Desktop only. Mobile always centered below/over the image. |
| Color scheme | Scheme picker · inverse | Controls text and button colors together. |

### Button "Shop now": states

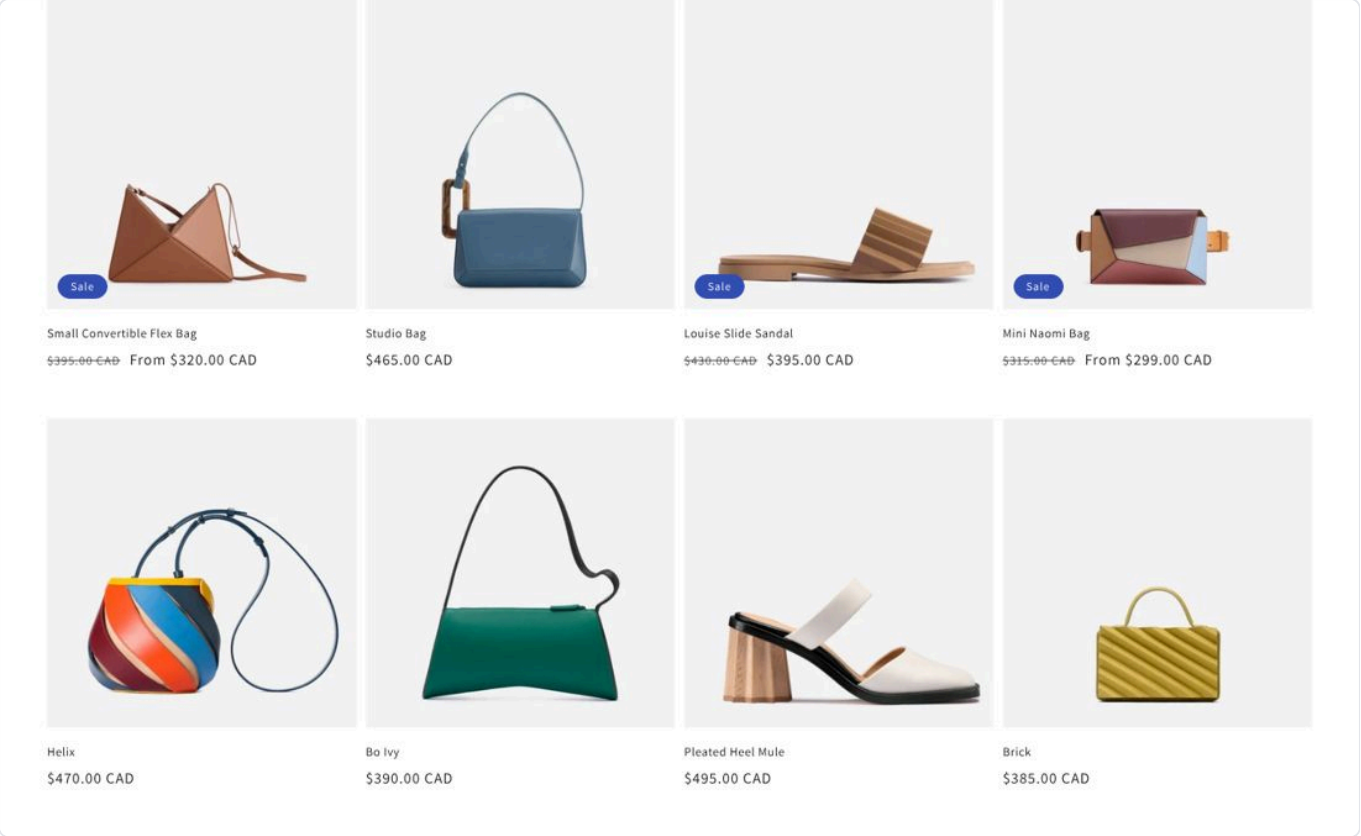

| State | Fill | Text | Border / effect | Timing |
|---|---|---|---|---|
| Default | transparent | white | 1px white | — |
| Hover | transparent | white | border thickens to 2px (box-shadow) | **0.1s** ease |
| Focus-visible | transparent | white | 2px outline, 3px offset | instant |
| Active | white 10% | white | 2px | instant |
| Disabled | Not used here. If the link is empty, hide the button instead of disabling it. | | | |

### Motion

No reveal animation in the default setup. **Optional:** fade + 30px slide-up for the text block on first load (0.5s, `ease-out` ). Skip it under `prefers-reduced-motion` .

04 · FEATURED COLLECTION

# Featured collection grid

A product grid with 8 products in 2 rows of 4 on desktop. Each card shows a square image on a light grey tile, the product title, and the price. Sale items show a pill badge "Sale" in the bottom-left corner of the image, plus a struck-through compare-at price before the current price ("From $320.00 CAD"). On hover the card swaps to the product's second image.

## Editable fields

| Field | Value / default | Rules |
|---|---|---|
| Collection | Collection picker | Source of products, in the collection's sort order. |
| Products to show | Range 2–25 · **8** | No "View all" button set here. Recommended to add one if the collection has more items. |
| Columns desktop / tablet / mobile | **4 / 3 / 2** | Grid classes `grid--4-col-desktop grid--3-col-tablet grid--2-col`. |
| Show second image on hover | Toggle · **on** | Only if the product has ≥ 2 images. Disable on touch devices. |
| Image ratio | Select · square | Options: adapt / portrait / square. Image tile bg = light grey. |
| Show vendor / rating | Toggles · off | Rating requires a reviews app. |
| Quick add button | Toggle · off | If on: "Add to cart" button under the price, or "Choose options" modal for variants. |

### Card anatomy & typography

| Part | Spec |
|---|---|
| Image | Square, `object-fit: cover`, lazy-loaded, responsive `sizes`: **367px @≥1600 · (100vw−130px)/4 @≥990 · (100vw−120px)/3 @≥750 · (100vw−35px)/2**. |
| Sale badge | **bg rgb(51,79,180), white, 12px, padding 6×13px, radius 40px**. Position bottom-left, 10px inset. Label is dynamic: "Sale" / "Sold out". |
| Title | Body font, 13–15px, 100% foreground, 2-line clamp. Hover: underline. Whole card is clickable. |
| Price | **16px, letter-spacing 1px**. Compare-at price: struck through, 75% alpha, smaller. "From" prefix when variants have different prices. |

### States & motion

| Interaction | Behavior | Timing |
|---|---|---|
| Card hover (pointer) | Second image fades in over the first (opacity 0 → 1). Title underlines. | **0.4s cubic-bezier(.25,.46,.45,.94)** |
| Image load | Lazy-load below the fold. Grey tile is visible as a placeholder, so there is no layout shift. | — |
| Reveal on scroll | **Optional:** cards fade up 2rem in sequence, 75ms stagger per card. | 0.5s ease-out |

### Accessibility

- The grid is `<ul role="list">`, each card an `<li>`. **Present.**
- One link per card (the title), stretched over the card with `::after`. This avoids duplicate tab stops for image + title.
- The image `alt` = product title. **Present.** The badge must be read as text ("Sale"), not as an image.
- Prices: put "Regular price" / "Sale price" in visually-hidden text so screen readers announce both correctly.

> The full document continues the same way for sections 3, 5, 6, 7 and 8: Rich text, Collage, Video (autoplay & play overlay rules), Press quotes, and Footer (newsletter form validation, country/language selectors, payment icons).
